(54) Abstract Title
Production of 3-D structural artwork, images or pictures

(57) A 3-D artwork, image or picture is produced by application of a structural mass 5 to a substrate 1 giving rise to a relief image, after which colour or pigment is applied. The structural mass may be a paste, acrylic resin, plaster, clay or lead solder. The mass may be applied by hand or using a scraper, trowel, knife, brush or by tube. The colour or pigment is applied by shaking, rinsing and/or skimming techniques. The substrate 1 may be treated with an undercoat 2 and a primer coat 3, and the image over-coated with a varnish 7.
